Overview of MILS 102L
Each laboratory (lab) is designed to lead peers, develop confidence, awareness, initiative, accountability and the ability to analyze and solve problems while applying the designed skills. Labs are designed to be taken in conjunction with MILS 101. Labs are designed to be hands-on, experiential learning sessions which develop total awareness of what it means to be an U.S. Army Officer.

Learning Objectives

Students will show understanding and be able to practice and apply their knowledge and understanding with hands on practical execution of tasks and skills.

Course Requirements

Attendance

Students must attend each session to earn credit. There are no scheduled make up sessions. On-time, regular class attendance is required.

Practical exercises and Field Training Exercises (FTX)

Students must practice the tasks or skills and then show mastery in the performance of the tasks or skills. Field Training Exercises (FTX) are extensions of the lecture and university lab providing additional practical application of theory.
